

# Microsoft 365 CLOUD BACKUPS

Protect your data with Microsoft 365 Cloud Backups from Area9. Our Microsoft 365 Backup solution uses industry-leading Cloud Backup technology from Veeam® to deliver a high availability cloud-based backup service that meets growing data protection needs in Australia.

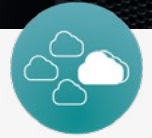

## Comprehensive Support Add-on

Our Microsoft 365 Cloud Backups service includes licensing and storage. To take your data protection to the next level, Area9 offers a Backup Software Support service as an add-on. This includes comprehensive monitoring and maintenance of your backup environment.

## Getting Started

Our specialists will set up your Microsoft 365 Cloud Backups using the following steps:

- We scope the existing environment to determine if it meets the minimum requirements.
- If your environment doesn't meet the minimum requirements and prerequisites for this service, we'll explain how this can be completed in a separate project.
- Once your existing environment has the green light, we'll put together a monthly quote based on your business requirements.
- Our experts configure your Microsoft 365 Cloud Backup including the items to be backed up, the frequency of the backup, and retention.

## Service Overview

- Backup protection for Exchange online, SharePoint, One Drive and Teams. By Default, Area9 backs up everything, but you can choose to limit backups to suit your requirements
- Protection from accidental, intentional or malicious deletion of your company data
- Control over the frequency of backup and length of backup retention
- Easily restore individuals, team, or whole of company data

## Why Implement Microsoft 365 Cloud Backups with Area9?

With valuable data being shared through Microsoft 365 programs, it's critical to have a backup solution in place. Since Microsoft doesn't include this, Area9 has developed a cost-effective and reliable solution for small, medium and large businesses.

- Reduced management and operational overheads for your business
- Protects Microsoft 365 data against malicious attacks
- Secure copy of your Microsoft 365 data saved locally in the Area9 Data Centre
- Rapid data recovery time
- Advanced backup monitoring
- Remote monitoring
- Fast emergency response and system failure recovery
- Expert implementation by Area9 Veeam Certified Engineers

## Peace of Mind Protection

Microsoft 365 Cloud Backups is an affordable way to ensure that your emails and data are protected.
